Manual Magnetic Blinds

Stylish and Sophisticated

BetweenGlassBlinds™ offer a versatile and contemporary means of privacy and shading.

Our totally cordless system is operated via sliding magnetic blocks. These simple-to-use and unobtrusive controls are located around the perimeter of the unit.

Contemporary and durable Venetian blinds are available with the full lifting operation happening in one slick and easy motion. The tilt function allows you to set the levels of vision and light to your specifications.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Available in sizes up to 2500mm high and 2000mm wide.
(Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 10 colours (see back page).
- Manufactured in accordance with all parts BSEN 1279 and have full CE accreditation.

Motorised- Battery Powered

Elegant and Effortless

Our wireless motorized blinds are controlled via a rechargeable lithium battery pack. This can be attached magnetically to either the glass surface or the frame.

With our sleek design, installation is quick and easy, with no electrician needed and no unsightly wires to spot. The blinds can be operated via buttons on the battery pack, or at a distance with a remote control.

For the ultimate in easy usability, the blinds can be controlled individually or in groups of up to 12.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Simple up/down button functionality. Holding the button operates the tilt.
- Choose from Venetian, pleated, Duet Filtering or Duet Darkening blinds. Available in 10 colours (see back page).
- Solar panels can be provided to extend battery power.
- Available in sizes up to 2800mm high and 2500mm wide.
(Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.

Motorised- Hard Wired

Sleek and State-of-the-art

Our motorised blinds are powered externally, with nothing to detract from the refined and contemporary finish.

Perfect for those with hi tech plans, these blinds can be activated by a switch, by remote control, or through a home automation interface. For the ultimate in privacy and shading choices, the blinds can be controlled individually or in groups of up to 12.

Each respective unit needs to be wired directly to the power source. Wireless contacts can be supplied when wiring through door and window frames.

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Integrates easily with most major home automation interfaces (eg Lutron, Control 4, etc)
- Choose from Venetian, pleated, Duet Filtering or Duet Darkening blinds.
- Available in sizes up to 2800mm high and 2500mm wide.
(Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 10 colours (see back page).

No Strings Attached

Stylish and safe design with no external cords.

Completely Maintenance Free - protected from damage and dust.

Comes with a full 10 year warranty on the double glazed unit, 5 year warranty on the magnetic operation and 2 year warranty on the motorised blind.

Ideal for sliding and bifold doors.

Magnetic Blind Colours

Motorised Blind Colours

Venetian blind colours are representational only and these can be affected by your chosen glazing options.
Please contact us for further information and to request a swatch.

*RAL colours are an approximate match.
